Mr. Armin Arminak  
1350 Mountain View Circle  
Azusa, CA 91702  
Dear Mr. Arminak:

APR, the Association of Plastic Recyclers, is pleased to recognize APackaging Group's Infinity Fine Mist Sprayer as meeting or exceeding the most strict APR PET-CG-02 Critical Guidance Protocol for Clear PET Articles with Labels and Closures (up to 23.2% pump weight relative to the container), as well as APR HDPE-CG-01 Critical Guidance Protocol for HDPE Rigid Containers. This APR recognition is based on the technical recyclability of the trigger sprayer in the PET as well as HDPE bottle streams.

A Review Committee, appointed per the APR Recognition Operating Procedures, reviewed your data submission and concluded the data were correctly obtained by a qualified laboratory and were completely presented to show the sprayers submitted meet or exceed the most challenging test conditions and strictest APR Critical Guidance criteria.

The PET and HDPE Critical Guidance that were used to evaluate the APackaging Group's Infinity Fine Mist Sprayer, are the product of a multi-industry consensus process to identify and address certain key technical considerations related to the recycling of postconsumer PET bottles and HDPE containers. The Documents direct innovators to conduct specific testing per established testing procedures and then provide the innovator with guidance to interpret the results. The protocols are intended to help improve the quality of the recycled bottle stream by aiding innovators to make informed decisions about the consequences of packaging innovations. APR thanks APackaging Group, for voluntarily submitting this sprayer for Recognition. The impact of these protocols is beneficial to world-wide recycling efforts. Meeting the Critical Guidance Document guidelines is a truly significant step in demonstrating overall recyclability of your fine mist sprayer.

Our recognition applies only to the APackaging Group's Infinity Fine Mist Sprayer. While this Recognition speaks to the compatibility of your fine mist sprayer with PET and HDPE bottle recycling, it does not speak to collection of used bottles with sprayers or include other sprayers in the market that may conflict with the PET and HDPE bottle recycling process. We encourage APackaging Group to be sure in its packaging information that the public does not misunderstand that this Recognition applies to look-alike sprayers or to believe collection is happening when it is not.

Yours truly,

President and CEO
